The Performance Management Organization (PMO) score is a composite index of implementation quality. The PMO is built around 14 functions that effective schools have mastered. In each of the 14 areas, school personnel responses and field researcher observations were rated and compiled. Final scores were calculated as follows:

As an indicator of overall student achievement, we provide information regarding CRM students’ performance on state standardized tests in reading and math. These data are publicly available from the Louisiana Department of Education. For each year of school operation, we report the percentage of students attending Einstein Sherwood Forest achieving proficiency or above on Louisiana’s state standardized tests in both reading and math.

When the Einstein Group first opened their CRM school, they considered it an extension of their original campus rather than a school of its own. By 2016, Einstein had established the CRM school as its own entity, serving grades K through 5 in a renovated building as Einstein Sherwood Forest. Their performance and accountability clock restarted in 2016-17 with this reconfiguration.

Explore the findings and see what we discovered.

**Enrollment & Demographic Profile**

Einstein Extension’s enrollment demographics remained fairly stable over the evaluation period. A slight increase in the percentage of Hispanic students was observed in the second year of operation, after which the percentage returned to the level in the first year. The percentage of students eligible for free meals dropped in the first year of operation before rising again in the second year, before leveling off in 2015-16.

**PMO Score**

PMO Stage Description

- **Absent**: No data available
- **Developing**: Developing
- **Accomplished**: Accomplished
- **Exemplary**: Exemplary

**Student Impact**

**School Proficiency Level**

**Implementation Summary**

The Einstein CRM school was open for a total of four years. The CRM and Einstein models were designed to support schools with the highest potential for student and community benefit and to allow for flexibility in school design and operations. Students in CRM schools had been considered the segment of the student body in which higher student achievement could be anticipated. However, this model was intended to be flexible in its design, allowing for a range of school configurations and operational models.

In the first year, student performance was benchmarked against the benchmarks of the Flagship school, a charter school in the city of New Orleans. In the second year, student performance was benchmarked against the benchmarks of the Gravity school, a charter school in the city of New Orleans. In the third year, student performance was benchmarked against the benchmarks of the Gravity school, a charter school in the city of New Orleans. In the final year, student performance was benchmarked against the benchmarks of the Gravity school, a charter school in the city of New Orleans.

**School’s Current Status**

When the Einstein Group first opened their CRM school, they considered it an extension of their original campus rather than a school of its own. By 2016, Einstein had established the CRM school as its own entity, serving grades K through 5 in a renovated building as Einstein Sherwood Forest. Their performance and accountability clock restarted in 2016-17 with this reconfiguration.
