

Evaluation of Scaling the New Orleans Charter Restart Model:

Student Impact
Einstein Extension (now Einstein Sherwood Forest)
Cohort 3, New Orleans, LA

Explore the findings and see what we discovered.

Enrollment & Demographic Profile

Einstein Extension's enrollment demographics remained fairly stable over the evaluation period. After its first year, Einstein Extension experienced an increase in the percentage of Hispanic students. The percentage of students eligible for free/reduced price lunch dropped in the second year of operation before rising again to previous levels in 2015-16. Demographic data are provided for only those years during which Einstein Extension was included in the CRM evaluation.

PMO Score

The Performance Management Organization (PMO) score is a composite index of implementation quality. The PMO is built around 14 functions that effective schools have mastered. In each of the 14 areas, school personnel responses and field researcher observations were rated and compiled. Final scores were calculated as follows:

Rubric Score	PMO Stage
0	Absent
100	Developing
200	Accomplished
300	Exemplary

School Proficiency Level

As an indicator of overall student achievement, we provide information regarding CRM students' performance on state standardized tests in reading and math. These data are publically available from the Louisiana Department of Education. For each year of school operation, we report the percentage of students attending Einstein Extension (now Einstein Sherwood Forest) achieving proficiency or above on Louisiana's state standardized tests in both reading and math.

Implementation Summary

The Einstein CRM school was originally considered an extension of the Flagship campus. The CMO maintained tight control or oversight of numerous building level functions that in other charter schools would have been considered the aegis of the principal. However, this close relationship allowed for a high-fidelity transport of the Flagship model. Einstein is unique within the CRM evaluation in that its authorizer is OPSB. Einstein believes that full school turnaround requires at least a three-year runway, and in fact we see that by their third year of operation, Einstein had turned its focus to issues of longer term sustainability after having achieved a degree of stability and success at their CRM school.

School's Current Status

When the Einstein Group first opened their CRM school, they considered it an extension of their original campus rather than a school of its own. By 2016, Einstein had established the CRM school as its own entity, serving grades K through 5 in a renovated building as Einstein Sherwood Forest. Their performance and accountability clock restarted in 2016-17 with this reconfiguration.
